

**AJ91**

***Air Closer Sliding Door System***

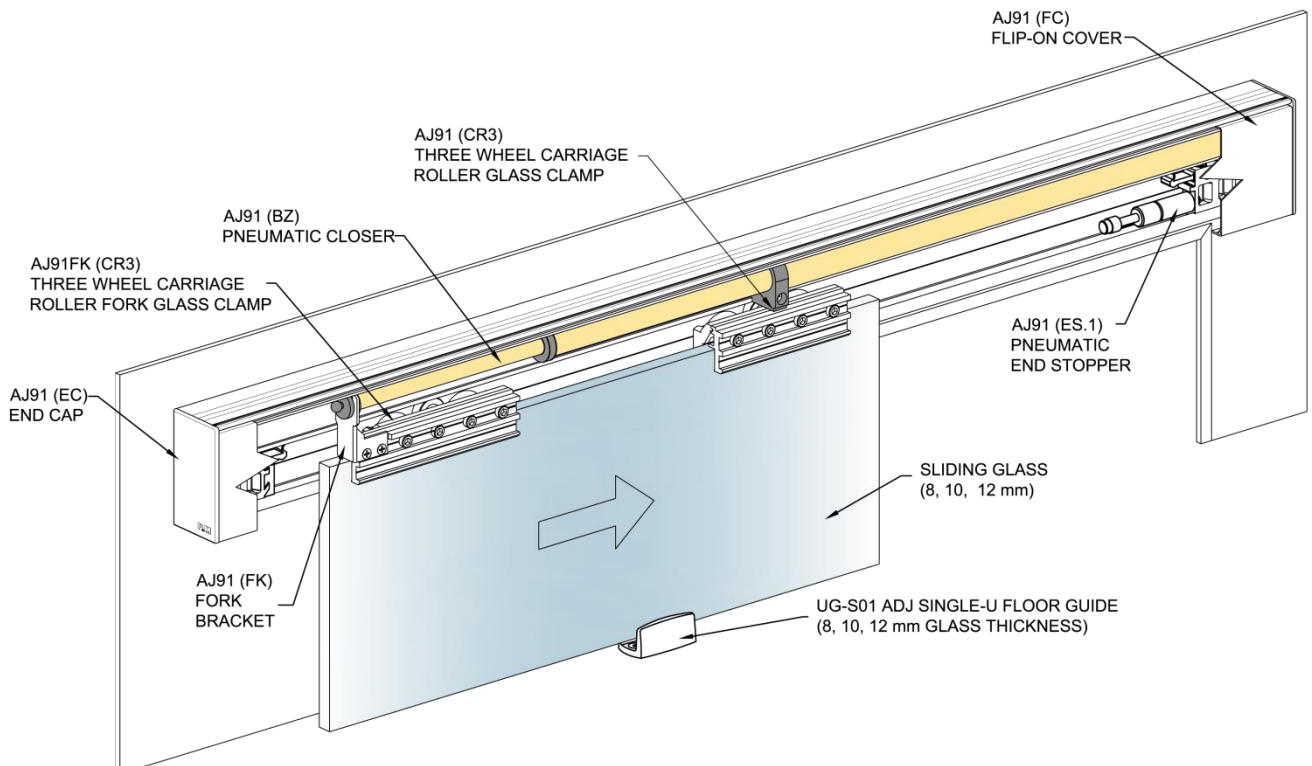

**P&M AJ91 – Air Closer Sliding Door System** is made up of an aluminum track geometry of 90.5mm Height by 47mm Width. AJ91 can support and transport glass panels of up to 120kg with two pieces of bi-part aluminium / stainless steel glass clamp that encompasses three independent ball bearing polyacetal encased rollers in each clamp. All these operational equipment are integrated out of sight within its slim-line track geometry.

With its clamping efficiency carefully considered, **P&M** AJ91 does not require any glass preparation and can engage glass thicknesses between 8, 10 and 12mm. To compliment this system of elegance, it is surface treated with Alinox (LXG1.2) finish that has a stainless steel effect for both aluminum track & flip-on aluminium cover.
