Slide and Fold

Glass Panel System

SLF400

SLF400 Slide and Fold Glass Panel System features a straight sliding aluminium top track. This system is able to carry frameless glass door panels of up to 2700mm in height and width of up to 750mm.

Note:
Kindly consult our technical advise if panels exceeds stated dimension.
Subject to technical consideration on the maximum number of panels.

With its robust carriage roller made up of stainless steel body with ten ball bearing wheels, it allows better weight distribution and stability, thereby eliminating excessive swaying and reducing the track to wheel friction thus translating smooth and effortless sliding motion.

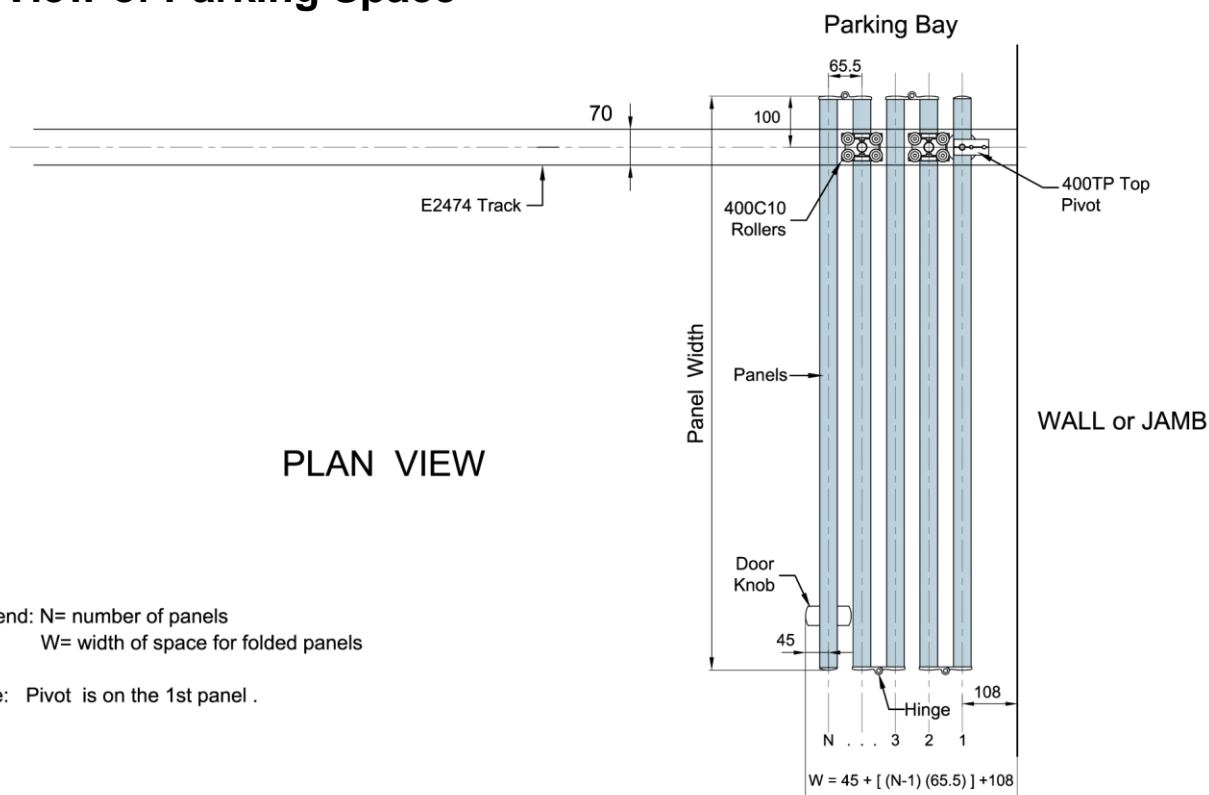

SLF400 complements both maximum shop front area and close customer proximity as the inter-locking frameless glass panels are dock in an accordion-like manner.

It also enhances maximum security with various security locking devices (key lock; thumb turn lock).

SLF400 comprises of sliding door intermediate panels and swing door pivot panel. In addition, you have a choice of both aluminum clip-on rail covers or stainless steel rail-covers of both polish and satin finish.
